### **Chart Browse Keys**

Press the **Home** key to browse back one chart, press the **End** key to browse forward one chart (while a quote page is open).

### **CTRL Keys**

The following keyboard commands can be used while viewing a chart. The commands can be used to change the chart symbol in the active window, display a Time & Sales for the current chart, display Snap Quotes, display and change the chart properties, set alerts, edit chart data, and control chart templates.

Each hot key is a Control Key sequence. Hold down the **Ctrl** key and then press the companion key once. Example, to set an alert on a chart, move the mouse cursor to the desired alert price level and then press **Ctrl-A** (hold down the **Ctrl** key and then press the letter **A** once).

- Ctrl-A - Set a price Alert at the cursor position Ctrl-B - Toggle the Bar Data panel on/off the chart - Toggle the Big Cross cursor on/off the chart Ctrl-C - Delete the chart bar at the cursor location. Ctrl-D Ctrl-E - E-mail the current window or chart image Ctrl-F - Toggle a Chart to Zoom Fullscreen and back to Normal size. Ctrl-H - Edit the High price to the cursor location on the bar that is being pointed to. Ctrl-I - Inserts a bar on a chart at the mouse cursor location. Ctrl-J - Saves a .PNG Graphics image of the current Chart or Properties window. - Toggle the Chart colors to Printer Friendly Colors, then back to Original Colors. Ctrl-K Ctrl-L - Edit the Low price to the cursor location on the bar that is being pointed to. Ctrl-O - Display the Chart Objects list for the current chart. Ctrl-P - Display the Chart Properties window. - Display Snap Quote window for the current chart symbol. Ctrl-Q - Remove both High and Low alert from a chart. Ctrl-R Ctrl-S - Prompts for a symbol, and then changes the current chart window. Ctrl-T - Display Time & Sales window for the current chart symbol. Ctrl-V - Toggle the Volume bars on/off the chart Ctrl-X - Toggle the chart Bars on/off the chart
- Ctrl-Y Toggle the Study Data panel on/off the chart

Ctrl-Z - Adjust the chart prices for Stock Splits or scale adjustments

Ctrl-1 through Ctrl-9 and Ctrl-0 can be used to apply one of the first 10 Templates on a chart.

- Ctrl-Alt-A Causes all open charts to Align to the same date and time as the active chart. For example, if you drag the chart bars back 1 month, and then press this keyboard sequence, then all open charts will jump back 1 month and align themselves to the active chart.
- Ctrl-Alt-R Causes all all studies on a chart to recalculate. This provides a manual way to quickly recalculate and redraw all studies that are on a chart.

### **Quote Page Hot Keys**

The following keyboard commands can be used while viewing a Quote Page. Each hot key is a Control Key sequence. Hold down the **Ctrl** key and then press the companion key once.
