

Testimonials

"I'm very excited for the Angle Fan you added to the Circle properties. I have tested and the results are amazing. Extremely nice. I really appreciate efforts that you always try hard to make your customers happy." - C. Sundlof

"I truly feel that Ensign Software is in the top 5 best performing charting softwares for active traders, if not the very best, and I definitely feel it is a strong advantage for anyone that chooses to use it. I sincerely appreciate that your company and team supports our group and provides the chat room and specialized charting features. I will continue to refer new members to your service, as it is the BEST choice they can make to have access to good tools, and to understand the lessons shared in the Fluidity Trader chat. Thanks!" - C. Edmonson

"Let Howard know I've been an Ensign user since 2005. And I hope to be an Ensign user for the next 20 years. I'm absolutely thrilled with it. It's made me a Powerful Financial Trader I never, ever thought I'd become." - Keith J.

"Over the past months I have been working closely with Mike, developing custom ESPL tools for my trading. Aside from the fact that working with Mike has been a truly wonderful experience, it also reminded me how excellent Ensign Customer support is and I wanted to write and compliment all of you on this. My background aside from Trading is in music and over the years I have had many experiences in the music software world. Ensign support reminds me of type of support I used to get from music technology companies 20+ years ago, when they really cared about their end users. These days most have grown and grown and forgotten their roots - they have become more consumer focused (whatever happened to talent ? !) both in the products they offer and the support to run alongside those products. That means that for professionals, it has become increasingly difficult to contact a music tech support dept., and actually find a support employee that knows as much as them, let alone help them through the problem to a satisfactory conclusion. The standard modern catch all of 'well you can always try the forums' is...well...pathetic. And it is this comparison that prompted me to write, as Ensign has the best support of ANY technology companies I deal with (well actually any company full stop), and I'm a great believer in saying 'thank you and well done' when it should be said.....so..... I said it! Thanks for reading and again for all the help you've provided over years, it's always appreciated." - Mark B.

"Thanks you very much for your patience and your perfect support. That's what I call service and what we miss so much in Germany. I am happy using Ensign again and I love the software. I tried ~~~ and another one before in 2006 but nothing compared to Ensign. I use the Traderbyte feed for accurate data on the charts." - Michael

"It seems that we never take the time to thank the people that have had a positive impact on our lives. I wanted to take this opportunity to tell me how much your 'Ensign' has meant to me. I am in my seventies now. In looking back over the years (28 from when I first purchased your program) I am amazed at how fast the time has gone by. I have found your 'Ensign' to have given me the most service of anything I have ever used. I never could take advantage of all that it could do, but I used it to the best of my limited ability which accomplished all that I have ever hoped for. Even today all of my templates and charts are setup using "Howard's Average". Even though I don't know how to compute it, I use it for all my longer term bottoms and tops. I just love 'Ensign'. I have long recognized that the most important thing in life is character and integrity. After all these years you, Kimball, Paul and Sheldon have exemplified this every day. Thank you all your years of service. Your character and integrity have always shone through in your day to day actions. It must be a wonderful feeling to have created such a wonderful contribution to traders." - L. Dozier
