This document shows how to connect Ensign 10 to a Cannon Trading account with live market data.

To configure Ensign 10 with a Cannon/StoneX data feed, select 'Cannon Trading' from the 'Data Feeds' list. Note: This data feed is recommended for Delta Trading Group members because of the low margin requirements, low commissions, and free trading DOM from StoneX.

To configure Ensign 10 with a Cannon/Ironbeam data feed, select 'Ironbeam' from the 'Data Feeds' list.

The screenshot shows the 'Setup Vendor Feeds' window for Ensign 10 version 01-30-23. The window is titled 'Setup Vendor Feeds - Ensign 10 version 01-30-23' and has a blue header with a help icon, a printer icon, and a close icon. Below the header, there are two tabs: 'Data Feeds' (selected) and 'Activity'. The main content area is divided into several sections:

- Data Feeds List:** A vertical list of data feed providers. 'Cannon Trading' is highlighted in green. Other providers include FXCM, Interactive Brokers, eSignal, TransAct Futures, IQFeed, TraderBytes, Barchart, Ninja Trader, IG Markets, IG Markets Direct, TD Ameritrade, and Ironbeam. At the bottom, there are 'Ensign Internet' and 'Ensign Playback' options.
- Cannon Trading Configuration:** A section with the title 'Cannon Trading'. It contains several checkboxes: Connect, Auto Connect, Beep on Connect, Warn on 'No Feed' (try to reconnect), Email on 'No Feed', and Auto Add Symbols. Below these are fields for 'User ID' and 'Password', both masked with black dots. A 'Log-in Mode' dropdown menu is set to 'Live Feed'.
- Symbol List:** A list of symbols: CL#F, CLH23, ES#F, ESH23, NQ#F, YM#F, ZB#F, and ZN#F. Below the list are eight numbered tabs (1-8).
- Data Feed Status:** A section titled 'Data Feed' showing a green progress bar. Below it, the status is 'On-line', the feed is 'NQ#F', packets received are '39,834', and symbols are '8'. The CID is 'EX743497'. There are buttons for 'Cannon Trading Help' and 'Symbol Guide'.

At the bottom right, there is a note: 'Tabs are for creating separate symbol lists. Only symbols on the selected tab will request live data from the data feed.'

Connect – Check this box to connect to the data feed. Uncheck the box to disconnect from the data feed.

Auto Connect – Check this box to have Ensign automatically connect to the data feed when Ensign runs.

Beep on Connect – When checked, Ensign will make a sound when the data feed connects.

Warn on 'No Feed' – Display a warning message when data is not seen for 2 minutes.

Email on 'No Feed' – Send an email if the data is not seen for 2 minutes.

Auto Add Symbols – Check this box to have Ensign add symbols to the Symbol list automatically when a chart is opened for a new symbol.

Name – Enter the User name associated with your data feed account.

Password – Enter the Password associated with your data feed account.

Symbol List – Ensign 10 will receive data for the symbols added to the Symbol List. The Symbol List is your personalized Watch List. Ensign will only receive live data for those symbols entered in this list. Type directly in the list to add, remove, or rearrange the symbols. There are tabs below the Symbol List that allow you to setup 8 different customized symbol lists. Only the list that is showing will be active.

Data Feed – The Data Feed panel displays status information about the data feed connection.

Symbol Guide – Click this button to open and view this document.

Futures Symbol Guide

Futures and Futures Options can be obtained from the following exchanges: CME, CBOT, COMEX, KCBT, MGEX, ICE, NYMEX, and others. Trade the Currencies, Energies, Financials, Grains, Indices, Meats, Metals, and Softs. Press Ctrl-F on the keyboard to search down through the symbols.

Futures Commodity symbols are created in three parts: the root symbol, the month code, and the year code. The month code is represented with a single letter as displayed below:

F January
G February
H March
J April
K May
M June
N July
Q August
U September
V October
X November
Z – December

Note: Each Futures market symbol trades in specific contract months. For example, many of the currency and index symbols trade only in the H,M,U,Z months. Visit each futures exchange for details on a symbol's trading hours and trading months.

The year code is displayed as two digits:

2023 would be displayed as 23
2024 would be displayed as 24

For example, the Emini S&P 500, December 2023 would be ESZ23
ES is the root symbol, Z is the month of December , 23 is for the year 2023

Sample Futures Symbols

ESZ23	Emini S&P 500, December 2023 contract
NQH23	Emini Nasdaq, March 2023 contract
YMM23	Emini Dow Jones, June 2023 contract

Continuation symbols use the root symbol followed by #F. Example: ES#F

Continuation symbols are create by Ensign 10 using the Symbol's Roll Schedule for the Months and Roll Day. Example: ES#F trades in the months of HMUZ and rolls on the Thursday before the 3rd Friday of the roll month. Root Symbols for several Futures Markets and Exchanges
